---

PROFILE

Unity Gameplay Developer specializing in player mechanics, enemy AI systems, and gameplay programming using C# and Unity. Experienced in building FPS, endless runner, and platformer prototypes with modular gameplay systems, AI behaviors, and physics-based interactions.

GAME DEVELOPMENT SKILLS

Languages: C#

Game Engine: Unity

Gameplay Systems: Player Controller, Enemy AI (FSM), Shooting Mechanics, 2D/3D Physics, Procedural Spawning

Tools: Unity Animator, NavMesh AI, Unity Input System, Unity UI System

Concepts: Object-Oriented Programming, Modular Gameplay Design, Performance Optimization

PROJECTS

Third Person Shooter (Unity, C#) – In Development

- Developing third-person player controller and camera follow system
- Implementing weapon firing mechanics and FSM-based enemy AI behaviours

FPS Shooter Game (Unity, C#)

- Implemented first-person player controller and shooting mechanics
- Implemented FSM-based enemy patrol and combat AI with health and damage system

Endless Runner Game (Unity, C#)

- Developed procedural obstacle spawning system using object pooling
- Implemented score system and game-over mechanics

2D Platformer Game (Unity, C#)

- Implemented player movement, jumping physics, and enemy interactions
- Designed trap hazards and collectible mechanics

PROFESSIONAL EXPERIENCE

Unity Developer Intern

Bigboy School of Gaming — 6 Months

- Developed a FreeCell Solitaire card game using Unity and C#
- Implemented card movement logic and rule validation
- Built UI interactions for card gameplay

EDUCATION & TRAINING

6 months Certificate Course in Unity 2D/3D Game Development, BigBoy School of Gaming -**2025**

Bachelor of Arts (English), Capital University
